

EXPERIMENT - 1

REGISTER NUMBER: 23MIS0142

NAME: BARATH D

BAD DESIGN -1 WATER DISPENSER

DESCRIPTION:

The water dispenser does not clearly indicate the Hot and Cold-water outlets. This makes it difficult for users, especially first-time visitors, to identify the correct option.

SOURCE OF PHOTOGRAPH:

PLACE: VIT – SJT

Reason why the design is bad:

- No clear indication of Hot and Cold water.
- Confusing for first-time users.
- Increases the risk of selecting the wrong water temperature.

Suggested Improvement:

- Add clear Hot and Cold labels.
- Use colour coding (Red for Hot, Blue for Cold).
- Place labels at eye level for better visibility.

BAD DESIGN -2 STAIRCASE**DESCRIPTION:**

The staircase lacks clear directional or usage signage. Users are not guided on the correct way to use the staircase, which may lead to confusion and inconvenience.

SOURCE OF PHOTOGRAPH:

PLACE: VIT – SJT

Reason why the design is bad:

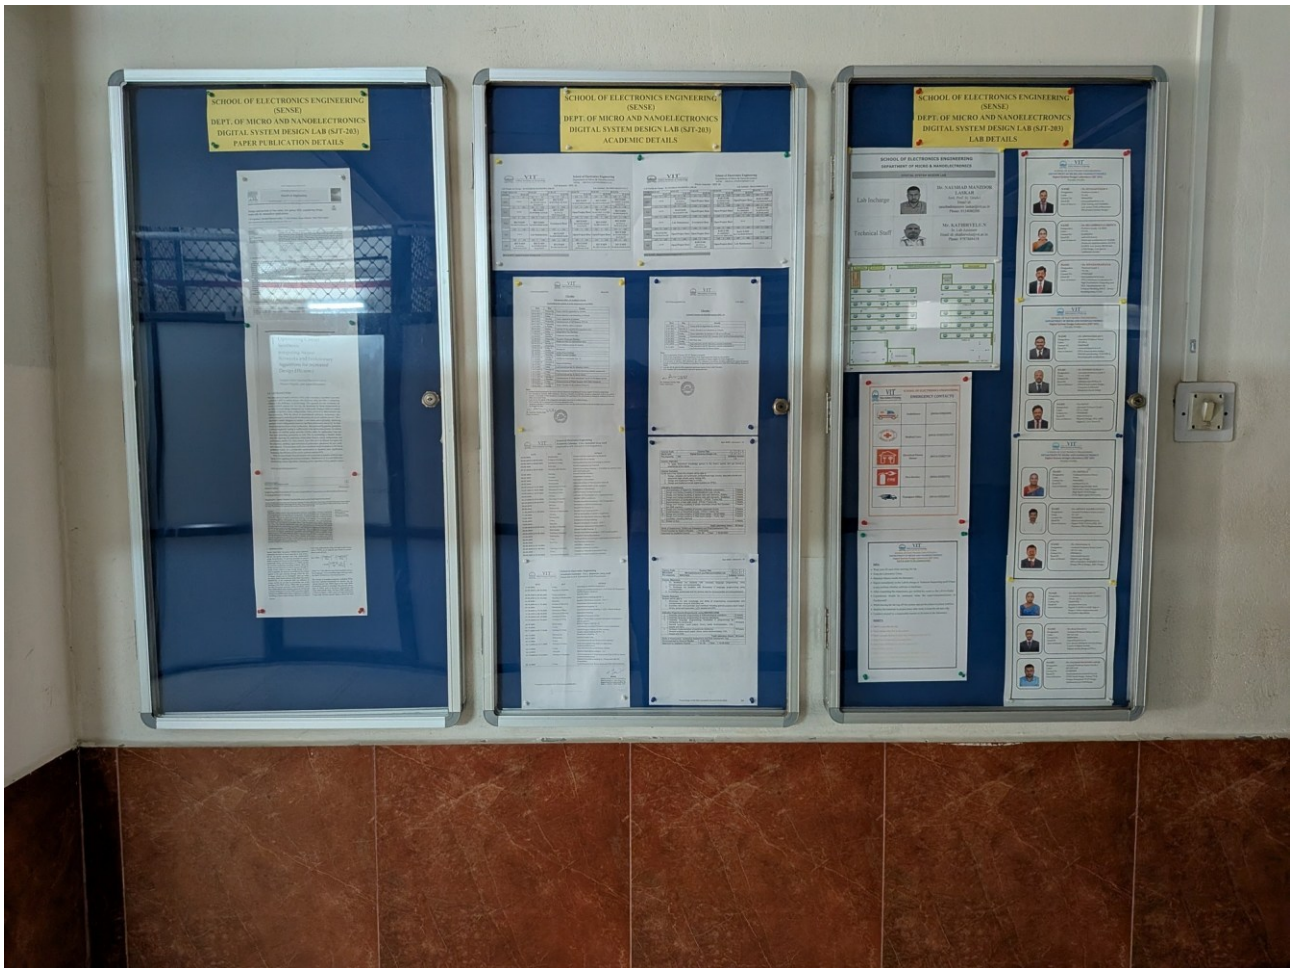

- No directional or usage signs.
- Difficult for new students and visitors to navigate.
- May lead to congestion during peak hours.

Suggested Improvement:

- Install clear directional and usage signs.
- Display floor numbers at each landing.
- Use arrows to indicate movement directions where required.

BAD DESIGN -3 NOTICE BOARDS**DESCRIPTION:**

The notice board is cluttered with multiple notices, making it difficult for students to quickly locate important or recent information.

SOURCE OF PHOTOGRAPH:

PLACE: VIT – SJT

Reason why the design is bad:

- Notices are poorly organized.
- Important announcements are difficult to identify.
- Reduces readability and user attention.

Suggested Improvement:

- Organize notices into separate categories.
- Remove outdated notices regularly.
- Use clear headings and maintain proper spacing between notices.
